

## EARTHQUAKE QUESTIONNAIRE

Insureds Name \_\_\_\_\_ Policy Number \_\_\_\_\_  
Property Address \_\_\_\_\_ Agency Name & # \_\_\_\_\_

1. Is the dwelling on or within 100 feet of a significant slope, beach, coastline or slide hazard area?\*
2. Is the water heater strapped with two (2) metal straps and bolted to the wall studs?\*
3. Has the sill plate been properly bolted to the dwelling foundation? (For dwellings built prior to 1976 verification is required.)\*
4. Does the construction include any cripple walls? If so, are they properly braced?\*
5. Is the dwelling built on a known fill, subsidence or mining area?
6. Are there any substantial cracks in the dwelling structure, foundation or chimney?
7. Was the dwelling damaged in any previous earthquake or landslide?
8. Does the dwelling have a continuous concrete foundation?
9. Type of dwelling construction?
10. Roofing material?
11. In ground swimming pool on the premises?
12. Number of stories?

**\*Photos are required of all dwellings on which Earthquake coverage is requested:**

1. Photos of the front and back of the dwelling, showing its relationship to the landscape and the slope of the property
2. A photo of the water heater showing the two metal straps bolted to the wall studs
3. For dwellings built prior to 1976, at least three photos of different locations showing the anchor bolts securing the sill plate to the foundation. (A report by a structural engineer, or a contractor's receipt for retrofitting may be submitted instead of photos.)

For dwellings with cripple wall construction, we will require photographs showing that the cripple walls have been properly braced with wood sheathing.
